Why do schools need storage containers?

When schools need more space for new construction, expansion or other needs, storage containers and modular buildings provide additional storage and workspace for students and staff. Our secure shipping containers are ideal for storing seasonal equipment and maintenance supplies.

What is a modular container building?

Durable and attractive modular container buildings that can be built and open in half the time of traditional construction, providing cost-effective option for commercial offices, medical buildings, kiosks, classrooms, child care facilities, government offices and more.

What size shipping containers do you use?

We used 12-by-40-foot shipping containers and 12-by-60-foot shipping containers approved by the California Department of Housing & Community Development with a pier and pad tie down foundation, recessed to ground level. All fixtures, doors and windows comply with childcare guidelines, including the 13 child-sized toilets and sinks.
