We offer a range of specialized prefabricated building types, each engineered to meet specific deployment and functional requirements within our comprehensive photovoltaic hospital systems.

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of ...

These panels usually use high-efficiency thin-film solar technology, which is light, flexible and easy to fold. The panels can be ...

The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery ...

Emergency backup power: Showcase the usefulness of solar containers during power outages, particularly in critical facilities like hospitals, data centers, and emergency ...

Powering remote areas: This containerized power generation solution can be quickly installed in remote areas not covered by the power grid to provide stable power for ...

These panels usually use high-efficiency thin-film solar technology, which is light, flexible and easy to fold. The panels can be folded inside the container for easy transportation ...

Powering remote areas: This containerized power generation solution can be quickly installed in remote areas not covered by the ...

Since launching of the Project in 2010, photovoltaic systems were installed at three hospitals in Dushanbe: the

National Medical Center (120 kW), the Research Institute of Obstetrics, ...

Compared with the Foldable Photovoltaic Power Generation Cabin, the folding power storage warehouse is equipped with energy storage battery, which is more suitable for long-term ...

Summary: Tajikistan's growing focus on renewable energy has sparked interest in combining photovoltaic (PV) systems with energy storage. This article explores the adoption of solar-plus ...

Emergency backup power: Showcase the usefulness of solar containers during power outages, particularly in critical facilities like ...
