The project is basically the installation of a 4 MW Floating grid connected solar PV plant located at the Lagoon at Providence. The lagoon at Providence was chosen as the site due to its ...

Developed by Qair, a French renewable energy company, the floating solar project is expected to be commissioned in 2026 and will ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, ...

Seychelles is set to launch Africa's largest floating solar farm by 2025. Learn how this 15 MW project will advance renewable energy, cut emissions, and boost energy security.

The in-country capacity is limited and the Seychelles Energy Commission (SEC) needed to have the appropriate support to ensure successful implementation of the project.

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant milestone for the region.

Seychelles has launched construction of its first utility-scale floating solar power plant, a 5.8MW project in the Providence Lagoon on ...

Developed by Qair, a French renewable energy company, the floating solar project is expected to be commissioned in 2026 and will connect to the 33 kV grid infrastructure of the ...

French independent power producer (IPP) Qair has secured a US\$5.7 million senior debt facility to finance the
