-----

Cemex and Synhelion are on their way toward achieving a fully solar-powered cement production with the latest scaling of their technology to industrially-viable levels.

This marks a significant milestone in the companies' journey toward the world's first fully solar-powered cement plant. An early 2022 energy lab demonstration in Spain saw ...

Pakistan's Fecto Cement Ltd has announced plans to expand its solar power capacity by 5MW, doubling its existing 5MW installation as part of a broader efficiency and ...

Solar power generation installed on cement facilities isn't just environmentally responsible - it's becoming the ultimate competitive advantage in a decarbonizing world.

In the present work, the authors have attempted to design a solar cement plant for supplying solar energy to the cement industry. A case study was done, which investigated a ...

Officials described the project as a breakthrough for Yemen, which has struggled with energy shortages and rising fuel prices. See the December issue of Global Cement ...

Whether you're building the next great solar energy plant, managing a utility-scale battery storage network, or enabling distributed community solar projects, the containerized 3.7MW PCS / ...

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the scaling of their technology to industrially ...

There are over 1,350 major energy storage projects currently in the database, representing more than 108,000
