-----  
How do I access large-scale solar projects in New York?

In addition, you can access large-scale solar projects that participate in New York's wholesale energy markets (projects larger than 5MW AC) as they are not included in this dataset. To get started, click on the map for county-specific data or hold Ctrl and click multiple counties. To see statewide data, click outside the map.

When should a solar project be considered a type I action?

Anytime the agency judges that the Type I procedures would be more helpful. Under current SEQR regulations, the majority of commercial, ground-mount solar projects are considered Unlisted or Type I Actions. NYSDEC has adopted amendments to SEQR to be effective January 1, 2019 that impact the review procedures of solar projects.

Who is involved in a solar project?

An Involved Agency is any agency directly undertaking the project, or one that is responsible for approval, permitting or funding. In the case of solar projects subject to SEQR, the municipal board would likely have the greatest review authority over the project.

What is a solar PV system labeling guidelines program?

Solar PV System Labeling Guidelines program. As part of this QA program, NYSERDA and their contractors have performed thousands of inspections on solar PV systems installed in New York State since January 1, 2012. Many of these inspections have found issues related to incorrect, incomplete, or missing labels on installed equipment.

Working closely with our agency energy partners, we identify facilities across the entire city owned portfolio based on these criteria and install solar PV projects with the procurement ...

NYSERDA implements a number of programs to promote energy storage, including providing technical assistance and incentive funding for eligible energy storage projects in New York State.

Program Overview Relevant Local Laws Solar Progress How to Participate Current Project Locator Through the Clean Energy Program, DCAS works to expand distributed energy resources, including solar PV and energy

storage installations across the City's portfolio of properties. The City has established a goal of installing 100 Megawatts (MW) of solar photovoltaic (PV) on City-owned buildings by the end of 2030, and ...See more on [nyc.gov](https://www.nyc.gov) NYSERDA

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

New "small cell" design is leading to very optimized rural base stations, offering both 2G and 3G/4G local coverage, connected with state-of-the ...

HPD's Solar Where Feasible program has supported over 15 MW of cost-effective solar since 2020. The buildings will save approximately \$1.9 million on their annual electric bills and ...

New York State Energy Research and Development Authority (NYSERDA) offers objective information and analysis, innovative programs, technical expertise, and support to help New ...

When planning large-scale energy storage solutions like the Apia Energy Storage Station, land use efficiency isn't just a buzzword--it's a make-or-break factor.

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy ...

New "small cell" design is leading to very optimized rural base stations, offering both 2G and 3G/4G local coverage, connected with state-of-the-art VSAT terminals.

The New York Solar Guidebook is a compilation of information, tools, and step-by-step instructions to support local governments with the development, installation, and maintenance ...

A holistic view of the solar installed in New York State. Discover installed capacity, number of projects, and annual trends for completed projects through aggregated data from NYSERDA, ...
