What is the implementation and development of 5G networks in the Czech Republic?

The Implementation and Development of 5G Networks in the Czech Republic document is a sub-strategy focused on a specific area of constructing and developing infrastructure for high-speed communication. It is part of the Digital Czech Republic concept and the Innovation Strategy of the Czech Republic 2019-2030.

Is the Czech Republic ready for 5G?

The situation in the Czech Republic is also in line with the global development, because at present, only NSA networks have been deployed around the world. The second phase is to run purely networks that fully comply with the upcoming specifications for 5G standalone (SA) networks.

Which MNOs have 5G coverage in the Czech Republic?

Vodafone covers over 96.47%, O2 over 93.56% and T-Mobile 93.40% of the population in the Czech Republic (data as of 1 November 2024). The three MNOs, in cooperation with the Prague Public Transit Company (DPP) and CETIN, have also deployed 5G coverage in all stations across the Prague metro network.

What frequencies will be used for 5G in Czechia?

Other bands, such as 66 - 71 GHz, will be also used by 5G. How far is Czechia with preparations? Frequencies in the bands 700 MHz and 3.4 - 3.8 GHz needed for deployment of 5G networks have already been the subject of frequency auctions.

By the end of the year, 5G should be available to one-quarter of the population of both metropolises. However, the rapid and across-the-board deployment of new networks in the ...

In the Czech Republic, coverage is concentrated around larger cities such as Pilsen, Ceske Budejovice, Usti nad Labem or Liberec. However, 5G also covers areas with a ...
