Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing the grid, and driving the ...

Responses to energy supply emergencies across Australia vary depending on the type (either gas, electricity or liquid fuels) and scale of the supply disruption.

There are limited commercially mature options deployable in the near term in Australia. Even the most widely applied currently - lithium-ion batteries and pumped hydro - ...

Similar trends are emerging in Australia as households adopt solar-plus-storage to manage bushfire-related outages and heat-driven demand peaks. In this context, the choice ...

By embedding long-duration energy storage into the heart of the grid, Australia can move from variable renewable supply to 24/7 ...

"Recent events in the Far West region of NSW have demonstrated the need for long-duration storage to secure energy supply ...

"Recent events in the Far West region of NSW have demonstrated the need for long-duration storage to secure energy supply for Broken Hill and the Far West," NSW energy ...

With locations around Australia, we work with you to provide urgent power generators as soon as possible, to minimise your downtime during unplanned outages. Hire reliable power generation ...
