How do I Connect battery storage to a solar PV system?

There are two main ways to connect battery storage to a solar PV system: AC-coupled systems use the existing solar inverter along with a separate battery inverter. This setup is easier to retrofit since it does not require replacing the current inverter. However, it is slightly less efficient because the energy is converted twice.

Can you install a solar battery yourself?

Installing a solar battery yourself is possible if you're skilled. But, it's often better to hire professionals. They ensure proper installation, safety, and follow local rules.
