Explore Brazil's battery energy storage systems, focusing on current regulations, investment opportunities, and the role of these systems in the energy transition.

Find out more about Brazil's first battery storage auction and learn how it could strengthen overall grid reliability.

Brazil's Ministry of Mines and Energy plans to hold its first auction for electricity storage batteries in the second half of this year. According to Thiago Barral, the ministry's ...

The 2026 LRCAP - Storage, expected to take place in April 2026, aims to ensure the continuity of electricity by meeting the power needs of the National Interconnected System ...

The 2026 LRCAP - Storage, expected to take place in April 2026, aims to ensure the continuity of electricity by meeting the power ...

Brazil's battery storage market is still in its infancy, with only a limited number of projects in operation. However, the country boasts one of the cleanest energy grids globally, ...

The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar.

Changes to Brazil's first capacity reserve auction of 2025 could undermine the expansion of the procurement regime to include battery energy storage systems (BESS) in the ...

As Latin America's largest economy steps closer to mainstreaming battery energy storage, the world will be watching how Brazil balances ambition with regulatory clarity -- and ...

Brazil's Ministry of Mines and Energy plans to hold its first auction for electricity storage batteries in the second half of this year. ...

Earlier this year the country opened a public land bidding auction seeking 13GWh of standalone energy storage projects across four regions - Arica and Parinacota, Tarapaca, ...

The auction aims to boost Brazil's grid reliability by integrating energy storage for wind and solar power. Brazil is set to conduct its first auction for adding batteries and storage ...
