Almost unconsciously I hit the keyboard build macro that builds my entire solution. This can happen just as I notice a code change. The build dominates my computer, and I ...

To run a build task automatically before debugging, you will need to link a build task to your debug config. I'll try to illustrate the process below. First to access your build ...

On a successful build, I wish to copy the contents of the output directory to a different location under the same "base" folder. This parent folder is a relative part and can vary based on ...

Build solution will perform an incremental build: if it doesn't think it needs to rebuild a project, it won't. It may also use partially-built bits of the project if they haven't changed (I don't know ...

I am trying to install Pygame using this: `pip install pygame` and I get this result: `" pip install pygame Collecting pygame Using cached pygame-2.4.0.tar.gz (13.2 MB) Installing ...`

If the question here is if `docker-compose build` command, will build a zip kind of thing containing multiple images, which otherwise would have been built separately with usual ...

I'm trying to set environment variables in docker container during the build but without success. Setting them when using `run` command works but I need to set them during the build.

Both images would use `build-args` of the same name but different value. Also, as there are dozens of build args, it would be convenient to store them in a compose service specific build ...

It seems that `python setup.py build`, `sdist` or `bdist` can also build distribution, but I didn't find detailed instructions for these commands, the `setuptools` command reference lacks ...

Build an energy storage power station
