The 50 MWp solar photovoltaic plant will add significant renewable capacity to Albania's grid, supporting the country's transition to a more resilient and sustainable energy ...

The 50 MWp solar photovoltaic plant will add significant renewable capacity to Albania's grid, supporting the country's transition to ...

Five utility-scale solar photovoltaic parks with a combined installed capacity of 156 MW were commissioned in Albania in 2025. The largest of these, Sunny Side Solar (100 MW), ...

On May 6, 2025, the Albanian government approved the development of two new solar power plants, totaling 54 megawatts (MW) in capacity.

In addition to hydropower resources, Albania also has abundant solar and wind resources, which are currently almost entirely untapped.

It is the area with projects for the biggest solar power capacity in Albania. Euron Solar-PV is one of four proposals for photovoltaics that the ministry received for consideration.

Albania has achieved a significant milestone in its renewable energy transition, successfully generating 10% of its total electricity from solar power in 2025.

Tirana, Albania, April 24, 2023--To help Albania improve its climate resilience, diversify its energy mix and scale up clean and affordable energy sources, IFC is providing a EUR41-million financing ...

Southern and central Albania benefit from strong solar irradiation throughout the year. Many regions exceed 1,500-1,700 kWh/m² annually, making photovoltaic installations ...

With some of the highest solar irradiance levels in the Western Balkans, particularly in regions like Fier, Vlora, Saranda, Berat, and Korca, the country has immense potential for ...

As a country situated in a region with abundant solar resources, Albania has enormous potential for using solar energy through photovoltaic (PV) systems. With the energy ...
