Combining your roof and solar project just makes sense. Most solar panels last 25 to 30 years. If your roof is aging, replacing it first will avoid the need to remove panels later.

However, many wonder if solar panels can be used as a roof in new construction to save money on buying two materials. Solar panels can be utilized as a roof.

When we talk about solar panel roofs, we usually picture traditional solar panels mounted on the roof, capturing sunlight through photovoltaic cells and converting it into electricity. However, ...

While some materials require a more complex installation, solar panels can generally be adapted to work on nearly any roof. Below is a breakdown of the most common ...
