What is the Big Canberra battery project?

Installation is underway on behind-the-meter batteries at nine sites. The Big Canberra Battery project will deliver an ecosystem of batteries across the ACT to ensure that our electricity grid remains stable. The Big Canberra Battery project includes the installation of: installation of behind-the-meter batteries at nine government sites.

What is the Big Canberra battery transformer?

This stored energy will be used to support our electricity grid. The Big Canberra battery transformer was delivered to the Williamsdale site in early September 2025. The transformer ensures electricity stored in the battery is converted to the correct voltage to be safely supplied to the grid.

Why should Canberra invest in the Big Canberra battery?

The ACT Government remains dedicated to ensuring that Canberra remains one of the world's most livable cities. By investing in projects like the Big Canberra Battery, we're supporting economic growth, generating an ongoing supply of reliable revenue, creating local jobs, and attracting new investment in clean technology.

How do I contact the Big Canberra battery project team?

If you have questions about this project, email the project team at batterystorage@act.gov.au To receive update on the Big Canberra Battery Project, click here. Contact us at: batterystorage@act.gov.au The Big Canberra Battery project will deliver large-scale batteries across the ACT to ensure that our electricity grid remains stable.

Developer Eku Energy has reached a financial close for 250MW/500MWh BESS in Canberra, the Australian Capital Territory (ACT).

The NEMA type outdoor lithium battery enclosure can effectively control the inner ideal temperature of the cabinet and make the battery run in an ...

The compact power blocks allow the connection of power cables at input or output of BESS sub-systems
