What is a solar charging station?

Sun Charge Systems offers an innovative line of solar powered charging stations that allow users to plug in and charge their devices even when common electrical outlets aren't available. These charging stations are proudly made in the USA and are a great addition to any green energy initiatives.

Can a solar power station charge a small appliance?

They have enough capacity to power a few small appliances for a short time. With a host of different outlets (standard 120v outlets, USB ports, and DC chargers), you can use the station to charge electronics, too. And the units often come with portable solar panels, to add more charging capabilities and extend runtime.

How much does a solar power station cost?

This compact power station costs \$3,299 but offers "only" 2,200W and a battery capacity of 2,160Wh. Also, you can only charge it with Solar Saga portable panels. If that doesn't bother you, you'd love to hear that this compact powerhouse weighs only 43 lbs. 3. Goal Zero Yeti 3000X
