These projects provide a pathway to a sustainable, economically viable future for energy communities, preserve jobs and provide clean energy to meet America's increasing ...

Today, The Nature Conservancy and the Cumberland Forest Limited Partnership announced new agreements with Sun Tribe Development and ENGIE to develop 14 solar ...

17 former coal mines in the US are being transformed into clean energy hubs, featuring 14 solar farms and three battery storage sites.

In line with these efforts, the APEC project "Conversion of Coal-Fired Power Plants Using Energy Storage Systems: Experiences, Challenges, and Opportunities" was developed to promote ...

These projects provide a pathway to a sustainable, economically viable future for energy communities, preserve jobs and ...

As the nation's need for reliable and secure energy storage grows, the US Department of Energy's Oak Ridge National Laboratory (ORNL) is investigating the potential of repurposing ...

The promise of a coal power revival is already being undermined by new energy storage technologies, including sodium-ion batteries.

These groups can work together to maximize existing equipment, infrastructure, and permits to create new uses and value streams. This fact sheet summarizes key considerations and ...

Coal plant sites are becoming an increasingly attractive location for utility and energy storage development companies across the U.S. to site new energy storage systems.
