Colombia's environmental licensing authority ANLA has approved the Toluviejo solar project in the northern department of Sucre, clearing the way for the development of nearly ...

As of 2023, Colombia's renewable electricity generation capacity was 14.3 GW. Most of this capacity is hydropower. Solar power is growing fast, and in 2023 accounted for about 5% of the renewable capacity, up from almost zero five years earlier. The country has significant wind and solar resources that remain largely unexploited. According to a study by the World Bank's Energy Sector Management Assistance Program (ESMAP), exploiting the country's significant wind pot...

Atlas Renewable Energy says its 201 MW solar project in Ibagu e represents the company's first utility-scale installation in Colombia and is supported by financing from ...

That's where the Bogota Pumped Storage Power Station comes in. This \$800 million project, approved in Q2 2023, aims to solve Colombia's renewable energy puzzle through an ancient ...

Colombia's renewable energy sector could get investment of up to \$2.2 billion in 2024 across 66 projects that are soon to enter production or waiting to complete paperwork, ...

This document provides an overview of wind and solar energy in Colombia at the beginning of 2025, with commentary on outlooks.

Colombia's national grid is getting stronger in 2025 with 17 new energy projects, mostly solar, boosting capacity and resilience. Discover how distributed generation, solar ...

A utility-scale renewable energy plant using wind and solar combined with battery storage opened last week, a
