-----

BECS integrates, modernizes, standardizes, and enhances the Public Safety Communication emergency architecture to align with the Common Transport Layer and Services infrastructure ...

The Emergency Base Station Cabin represents a paradigm shift in telecommunications infrastructure deployment. By combining rapid deployment capabilities, ...

Designed for the next-generation of critical communications, Two47(TM) is engineered for interoperability, unflinchingly reliable and secure, and adaptable to meet your specific needs ...

An emergency communication system is necessary for first responders, who need to enter areas with no network coverage or damaged network infrastructure due to n

For anyone engaged in emergency radio use, understanding the critical functions and features of base station radios is essential for effective crisis management.

Whether you're managing a small local network or a large-scale national communication infrastructure, BelFone's radio base stations can be easily scaled to meet your specific needs.

Ensure clear, reliable communication when it matters most. Discover how a base station radio strengthens campus and emergency response networks.

These networks would allow public safety personnel and agencies to maintain communication connectivity throughout their operation. We propose adaptive self-deployment algorithms ...

Access to reliable communications services is a key factor in any emergency situation. ASTRI has succeeded

in producing a mobile base station that allows for cost-efficient, low-latency, and ...

We develop a prototype of a proposed mobile base station and test its operation in an outdoor environment. The experimental results provide a sufficient data rate to make an ...
