---

The next phase includes the installation of a battery energy storage system and a second solar power plant with an additional 40 ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. ...

EK SOLAR is a leading provider of renewable energy solutions, specializing in grid-scale storage systems for power stations. With projects across Europe, we combine cutting-edge technology ...

It was concluded that system flexibility and battery storage are essential components of the green transition and key to ensuring a stable and secure energy supply in ...

In late September 2025, Croatia achieved a significant milestone in its renewable energy sector. The solar power plant in the city of Belisce became the first in the country to be connected to ...

At the end of November 2024, Croatia had 25,406 solar power plants on the distribution grid, with a total capacity of 776 MW. The country achieved growth of 60% since ...

A global leader in renewable energy solutions, EK SOLAR specializes in grid-scale storage systems and hybrid power plants. With 12+ years of experience, we've delivered 2.3 GW of ...

By the end of 2024, Croatia had reached 3.8 GW of installed renewable energy capacity, with solar energy doubling its figures in one year. By 2025, photovoltaic power is ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader ...

The Radosavci solar power plant, with a connected capacity of 9.9 megawatts in Slatina, is now complete except for the grid connection. In addition, the 10 megawatt ...

The Radosavci solar power plant, with a connected capacity of 9.9 megawatts in Slatina, is now complete except for the grid ...

The next phase includes the installation of a battery energy storage system and a second solar power plant with an additional 40-megawatt capacity. Together, these ...
