-----  
How many solar parks will Cuba build by 2025?

The Cuban government's plan is to install 55 solar parks similar to the one in Cotorro by 2025. The total capacity will be 1,200 MW. These are part of a broader project running until 2028, which aims to build 92 parks, with the goal of adding more than 2,000 MW to the National Electro-Energy System.

What is the energy situation in Cuba?

The energy situation in Cuba is critical. The Cuban electrical system has suffered for years due to a lack of investment, aging infrastructure, and difficulties in obtaining fuel. First published in Spanish by El Toque and translated and posted in English by Havana Times.

What happened in Cuba in February 2025?

In February 2025, just before the inauguration of the Cotorro solar park, the country experienced a blackout that affected more than 56% of the island at once, forcing authorities to suspend classes and work activities. The energy situation in Cuba is critical.

How many solar panels will a new park have?

According to official information, the parks will use the same technology and have a capacity of 21.8 MW. Each will consist of about 42,588 solar panels and 1,638 support tables. Another key element to consider is the battery storage systems.

The plan anticipates one thousand megawatts of solar energy by 2025, but without installed batteries, which prevents meeting nighttime ...

The Cuban electrical system has suffered for years due to a lack of investment, aging infrastructure, and difficulties in obtaining fuel. First published in Spanish by El Toque ...

The plan anticipates one thousand megawatts of solar energy by 2025, but without installed batteries, which prevents meeting nighttime demand and limits the impact in the face ...
