How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as "the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems," adding: "During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts."

Should the European Union invest in hydrogen storage technology?

Renewable Energy Association President Fanos Karantonis advocated for hydrogen storage technology investment, noting significant European Union funding in this direction, while the Cyprus Biogas Association highlighted that existing storage schemes focus exclusively on battery technology.

There are four categories of projects that can claim grants in the first funding round including those with up to 120 kW, 121 kW-1 MW, more than 1 MW, and self-consumers.

Cyprus will have its first large-scale electricity storage infrastructure in place within 16 months, Minister of Energy George Papanastasiou said speaking at the Green Agenda ...

The government of Cyprus has published guidelines for a scheme to support the deployment of approximately 150MW/350MWh of energy storage.

Cyprus is set to build its first large-scale electricity storage system within the next 16 months, according to Energy Minister George Papanastasiou. This move is key to ...

Cyprus is set to operate its first large-scale energy storage infrastructure within the next 16 months, announced

Energy Minister George Papanastasiou on Monday at the Green ...

With the growth in electric vehicle sales, battery storage costs have fallen rapidly Cyprus's Largest Private Research Investment: The Cyprus Institute (CyI) has announced the launch of a joint ...

The government plans to complete a new energy storage system, along with storage installations at two Electricity Authority of Cyprus (EAC) power plants, by June 2026, ...

The planned battery storage infrastructure, to be installed between 2026 and 2030, will have a total capacity of 160 megawatts with the capability to store renewable energy for 2 ...

Cyprus is set to build its first large-scale electricity storage system within the next 16 months, according to Energy Minister George ...

The government plans to complete a new energy storage system, along with storage installations at two Electricity Authority of ...

The government of Cyprus has published guidelines for a scheme to support the deployment of approximately 150MW/350MWh of ...

By June 2026 at the latest, the distributed energy storage system with a total capacity of 120 MW, which is currently being implemented, will be operational and will function ...
