- In Jan 2023 Czech Parliament approved an amendment of Energy Law enabling from Feb 2023: streamlining of permitting procedures for new PV plants with capacity over 1 ...

The Czech Republic had almost two gigawatts (GW) of photovoltaic capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the feed-in tariff being reduced by 25%, after installing almost 1,500 MW the year before. Installations increased to 109 MW in 2012. In 2014, no new installations were reported.

In 2023, solar power generation capacity across all projects in the Czech Republic will reach nearly 3.5GW. There are more than ...

In 2024, the C& I market led Czechia's new solar installations, accounting for approximately 500 MW of the added solar, followed by the residential (430 MW) and utility ...

The study highlights that solar generation in Central Europe, namely in the Czech Republic, Hungary, Poland, and Slovakia, has grown twice as fast as the EU average since ...

In 2003 a Czech-Austrian information and training center for solar power was founded in the village of Vezovata Plane in South Bohemia. [23] That same year major Josef Mach claimed ...

Get the latest Czech energy news. The government is revamping its solar energy strategy with new subsidies and streamlined laws to boost renewables.
