Can you put batteries in a gas fireplace?

You should put the necessary batteries in the battery tray before turning on your gas fireplace if it has one. After reinstalling the battery tray in the access panel, shut the furnace door. The fireplace will then be lit as normal. Once your home has electricity again, remove the batteries.

What are external battery packs?

External battery packs are standalone units that can be connected to a gas fireplace. These packs typically consist of rechargeable batteries and a control unit. They are designed to provide backup power during outages and may need to be periodically recharged to maintain their effectiveness.
