-----

Solar and battery storage systems provide energy access on and off the grid to ensure reliable electricity flows even during critical disruptions. The Island of Dominica came ...

Dominica Electricity Services Ltd. (DOMLEC) is set to perform essential assessments on a newly deployed Battery Energy Storage System (BESS) at the Fond Cole ...

The BESS, with a combined capacity of 6MW/6MWh, will greatly enhance DOMLEC's ability to manage the electricity grid more efficiently, provide spinning reserve, and ...

The government of Dominica and the UAE Caribbean Renewable Energy Fund have declared new assistance for a hurricane-resistant clean energy project.

From Wednesday 30th April to Sunday 4th May 2025, Dominica Electricity Services Ltd. (DOMLEC) will be conducting critical testing of a recently installed Battery ...

The goal of these projects is to build generation capacity to meet the increasing demand for energy nationally, while also reducing the ...

The new BESS project is designed to significantly reduce reliance on diesel generation, enhances electricity quality, and ...

The goal of these projects is to build generation capacity to meet the increasing demand for energy nationally, while also reducing the Dominica Electricity Services Ltd. ...

A 5-megawatt/2.5 megawatt-hours battery energy storage system is slated to provide the Commonwealth of Dominica the necessary reserve power from existing sources of renewable ...

Dominica deep exploration of energy storage batteries The new BESS project is designed to significantly reduce reliance on diesel generation, enhances electricity quality, and strengthens ...

Discover how Dominica is leveraging wind, solar, and battery storage systems to achieve energy independence while addressing climate resilience. This guide explores active projects, data ...

The new BESS project is designed to significantly reduce reliance on diesel generation, enhances electricity quality, and strengthens infrastructure resilience in key ...
