This system utilizes a powerful 120KWH POWERWALL lithium battery to store solar energy generated from a GSL PV solar panel system. The purpose of this innovative ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, featuring a 99MWh battery system.

EcoDirect designs and supplies solar + battery projects in the Dominican Republic. Our team has the tools and experience to get your next project designed and delivered.

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate ...

Imagine working on a critical construction project when the grid fails - now picture instantly switching to silent, emission-free backup power. That's the reality portable energy storage ...

The Dominican Republic's 300MW project demonstrates how energy storage can transform island economies - reducing fuel dependence while enabling renewable growth.

We make energy storage and optimization solutions built on lithium-ion battery technology for businesses within telecom, commercial, industrial, and residential facilities across the world.
