In my earlier question I was printing a double using cout that got rounded when I wasn't expecting it. How can I make cout print a double using full precision?

Possible Duplicate: long double vs double I am unable to understand the difference between between long double and double in C and C++. Can anyone help?

Double-glass modules, with their performance in the face of salt mist, high temperatures and high humidity, have won the market's favour. However, this trend is not ...

To determine the model validation, the temperature and electrical performance of the monofacial double-glass module applied with the TPX/SiO₂ coating on the rear surface ...

While double glass modules offer numerous benefits, it's essential to consider factors such as weight and installation requirements. ...

The benefits of replacing the opaque backsheet with glass outweigh its disadvantages: For a conventional solar panel, when the snow gets thick or people step on it (during installation), ...

Double-glass solar modules are made up of two layers of tempered glass that cover both sides of the solar panel. As snow accumulates on a typical solar panel or people ...

By choosing heat strengthened glass panels on both sides, we have been able to use a thickness of 2.5mm and to demonstrate an excellent module resistance to all standard mechanical tests ...

494 A Double is not an Integer, so the cast won't work. Note the difference between the Double class and the

double primitive. Also note that a Double is a Number, so it has the method ...

A double has a much higher precision due to it's difference in size. If the numbers you are using will commonly exceed the value of a float, then use a double.

AFAIK, C supports just a few data types: int, float, double, char, void enum. I need to store a number that could reach into the high 10 digits. Since I'm getting a low 10 digit # from ...

From what I have read, a value of data type double has an approximate precision of 15 decimal places. However, when I use a number whose decimal representation repeats, ...
