---

The Duke Energy Solar Program represents a comprehensive initiative aimed at promoting the adoption of solar panels throughout Florida and South Carolina. This allows ...

As the DeBary Solar Power Plant captures energy from the sun, 74.5 MW of clean energy will make its way onto the grid. A portion of this energy will power the two 1-MW hydrogen ...

You may be eligible to sell your wind, solar or hydroelectric power to Duke Energy.

Get facts on source options, installation and how to connect.

Solar is a great renewable energy choice and is playing an important role in how Duke Energy provides electricity to customers. Find out how.

Duke Energy is implementing an incentive program called PowerPair for installing home solar generation with battery energy ...

When you're looking for the latest and most efficient Duge solar power generation system complete set for your PV project, our website offers a comprehensive selection of cutting-edge ...

Innovation in carbon-free energy: At Duke Energy Florida's DeBary solar site, the company successfully tested the nation's first system capable of producing, storing and using ...

The end-to-end "green" hydrogen system at Duke Energy's DeBary plant in Florida will produce hydrogen using solar power and use it to power a GE 7E gas turbine for peaking ...

Duke Energy is implementing an incentive program called PowerPair for installing home solar generation with

battery energy storage in the Duke Energy Carolinas and Duke ...

Solar photovoltaic (PV) power generation is the process of converting energy from the sun into electricity using solar panels. Solar panels, also called PV panels, are combined into arrays in ...
