-----  
Is the US headed for a glut of domestic batteries?

The US may also be headed for a glut of domestically produced batteries. South Korea's LG Energy Solution and SK On Co. --the third- and fifth-largest automotive-battery manufacturers, respectively--have plans on the books to build a total of 10 US plants.

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Where is battery manufacturing now?

As the transition from combustion-engine to electric vehicles has progressed, along with the growing importance of stationary grid-connected batteries, investment in battery manufacturing has grown. While much of this investment has so far been in China, investment is significant and growing in Europe and the US.

How does tariff risk affect a battery energy storage system (BESS) project?

Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability, as tariff changes can significantly affect cost structures and overall project economics.

The domestic build-out of battery manufacturing capacity accompanies another trend: growing foreign investment in US and European plants. The overwhelming majority of ...

CATL flooded the domestic market with inexpensive, efficient batteries. It wants to do the same overseas, but European politicians--and Donald Trump--stand in its way.

The export of energy storage cabinets requires a series of processes, let's take a look together!

As nations work toward meeting climate goals, the increasing reliance on intermittent renewable sources like solar and wind necessitates robust energy storage ...
