How much does Bess cost in Europe?

In early 2024, the price of residential BESS offered to end consumers in Europe ranged widely, from EUR400 to more than EUR1,200 per kilowatt-hour (kWh) (Exhibit 2). Historically, European OEMs built trust-based brands by highlighting their "made in Europe" status and rode the first-mover wave over the past ten years.

How are European Bess OEMs putting cost pressure on Europe?

These international players are placing cost pressure on European BESS OEMs by driving down prices. In early 2024, the price of residential BESS offered to end consumers in Europe ranged widely, from EUR400 to more than EUR1,200 per kilowatt-hour (kWh) (Exhibit 2).

Is Bess a market of the future in Germany?

BESS are undoubtedly a market of the future in Germany. However, economic success depends not only on the technology, but also on strategic risk management. Anyone investing should know whether - and how - risks are hedged. Optimistic scenarios alone are not enough. The energy transition needs storage.

What changes have been made to Bess projects in Germany?

The German legal framework for BESS projects is currently also in a process of changes: The German parliament adopted a comprehensive energy reform package on 31 January 2025, which includes relevant changes for BESS projects with the aim to further support the growth of storage capacities in Germany.
