What is Xir laminated glass?

XIR Laminated glass improves monolithic laminated glass solar control performance by almost 50% with minimal impact on view and aesthetics. XIR laminated glass enables designers to create solar control solutions incorporating curved glass and enhances the performance of point fixed applications.

What is mitrex solar glass?

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a future where sustainability is clear as day. Where photovoltaics meet limitless design, where color meets clarity.

What is the use of toughened and laminated glass?

Thanks to their low exterior light reflectance the products are widely used for modern glass facades where high reflectance is prohibited or undesirable. Where a safety glass is required, the products can be specified as toughened or laminated glass.

What is a Saflex solar PVB interlayer?

Maximize daylight. Save energy. Saflex Solar PVB interlayers are high-visible light transmittance, infrared (IR) radiation-absorbing interlayers designed to enhance solar heat gain performance in laminated glass compared to monolithic clear glass and laminates made with conventional polyvinyl butyral (PVB) interlayer.

XIR Laminated Monolithic can be fabricated in nearly all flat or architecturally curved configurations. By using tinted glass as the inner lite, the desire for solar performance ...

Solar Industries fixed flat glass skylights are an energy efficient way to bring natural light into your home. Natural light elevates room interiors and makes dark spaces ...

Solar Industries fixed flat glass skylights are an energy efficient way to bring natural light into your home. Natural light elevates room interiors and makes dark spaces come alive.

Extra clear low-iron float glass with very high solar transmittance for improved solar energy conversion,

consistent performance and durability.

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a ...

Thanks to their low exterior light reflectance the products are widely used for modern glass facades where high reflectance is prohibited or undesirable. Where a safety glass is required, ...

32" x 38" Solar Powered Venting Deck-Mounted Skylight - Laminated Glass - Fakro \$3,293.44\$2,352.45 Add to cart Quick view Compare Add to Cart

XIR Laminated Monolithic can be fabricated in nearly all flat or architecturally curved configurations. By using tinted glass as the inner lite, the desire for ...

Jinan Glasino Technology Machinery Co., Ltd founded in 2003, is the high-tech enterprises specializing in the production of Glass Tempering Furnace, CNC glass cutting machine, ...

High-Quality Material: Our laminated tempered glass is made from qualified tempered float glass, ensuring top-grade quality and durability for various applications, including staircases, ...

Saflex Solar PVB interlayers offer superior solar control, reducing heat gain and UV radiation while maintaining high visible light transmittance for laminated glass.

Laminated glass with PVB for safety and insulation. Insulated glass with chambers for thermal efficiency.
