---

The need for glass manufacturing electrification and decarbonization is growing, but there are many hurdles ahead. However, maintaining those temperatures - which range from ...

Longroad Energy Building 55-Acre Solar Field to Power Recyclable Glass Maker Ardagh Plant in California. The solar field will supply 20% of Ardagh's expected energy use.

A new California solar project will power about 20% of a glass manufacturing facility's electrical demand. Ardagh Glass Packaging ...

The Madera solar field, built, owned and operated by Longroad Energy, will deliver renewable energy to Ardagh's glass manufacturing facility, accounting for approximately 20 ...

The installation would be the Canadian company's first grid-scale deployment of its "advanced compressed-air energy storage" technology.

DOE's Office of Clean Energy Demonstrations (OCED) is proposing to provide funding to Gallow Glass Company (Gallo Glass) for Phase 1 of the Demonstrating Hybrid ...

By making energy storage the heart of its power supply, the factory has created a scalable and future-proof energy solution that supports its mission of sustainable glass ...

The Madera solar field, built, owned and operated by Longroad Energy, will deliver renewable energy to Ardagh's glass manufacturing ...

A new California solar project will power about 20% of a glass manufacturing facility's electrical demand. Ardagh Glass Packaging opened the doors to its 13 MW dc solar ...

Energy Storage We are working to help communities make their energy profile more resilient and reliable. Partner with us to develop energy storage and contribute to a clean energy future.

The California Energy Commission has issued its final permit for the Willow Rock Energy Storage Center, a first-of-its-kind energy storage system capable of discharging at full ...

The project plans to install a demonstration hybrid electric furnace at its Modesto, CA site. It will reduce natural gas use by up to 70% and increase recycled content in its glass ...
