North America is currently leading the world for utility-scale energy storage deployments, but could be overtaken by the second-largest market, the Asia-Pacific region, as early as 2023, ...

Equatorial Guinea is set to construct the first liquefied natural gas (LNG) storage and regasification plant in West Africa, advancing efforts to monetise gas resources through the ...

The energy industry is a key industry in China. The development of clean energy technologies, which prioritize the transformation of traditional power into clean power, is crucial to minimize ...

The recent fire that burnt the EDG warehouse and destroyed 96,362 out of the 100,000 meters procured under the project has compromised the PDO. As a result of this fire, about 578,000 ...

The project, owned and operated by AES Distributed Energy, consists of a 28 MW solar photovoltaic (PV) and a 100 MWh five-hour duration energy storage system. AES designed ...

This project plays a crucial role in Guinea's transition towards a more sustainable energy future. By leveraging advanced lithium battery ...

With 65% of Guinea's population lacking reliable electricity access [2], energy storage systems have become the unsung heroes in bridging power gaps. But here's the ...

In Guinea, a country grappling with significant energy challenges, two towns are making strides towards sustainable development with the recent inauguration of solar photovoltaic (PV) mini ...

You know, Africa's got this energy paradox - 60% of the continent lacks reliable electricity while sitting on enough renewable resources to power the world twice over. Guinea's cracked part of ...
