In this project, our goal is to demonstrate that castable cements can be used to make flanged pipe sections. This will offer a lower cost alternative to nickel alloys such as Haynes 230, to form a ...

The cement industry is an important CO₂ emission source and presents large thermal energy demands at low to high temperatures, making it a target for the assessment of ...

This study aims to develop a novel concrete formulation designed for high-temperature applications and capable of withstanding thermal cycling. To achieve this, a ...

Their study provides insights into the thermal performance of concrete for high-temperature applications, enabling the design and optimisation of thermal energy storage ...

Industrial energy storage serves as a critical solution for sectors such as cement and steel manufacturing, where energy consumption significantly impacts operational costs ...

In this work, techno-economic analysis is performed on a high-temperature thermal energy storage (TES)-based cement manufacturing process. In section 2, the details of the ...

The integration of cement energy storage technologies with renewable energy systems presents a sustainable approach to addressing energy demand fluctuations. Concrete ...

"Rondo has brought to market the world's first scalable, low-cost, high temperature thermal energy storage solution, and this project is ...

High-Temperature Resistant Energy Storage Containers for Cement Plants in Cambodia

"We reduced temperature-related maintenance costs by 67% after switching to high-temperature optimized storage. The containers essentially act as their own climate-controlled environments."

This article explores how cement is being applied in renewable energy storage, highlighting innovations in thermal, electrical, ...

Industrial energy storage serves as a critical solution for sectors such as cement and steel manufacturing, where energy ...

This article explores how cement is being applied in renewable energy storage, highlighting innovations in thermal, electrical, and chemical storage solutions that could ...
