While earlier projects like the MS Helios utilized solar panels exclusively for low-voltage onboard systems, the Blue Marlin features a ...

In a bold step towards decarbonizing one of the world's most polluting sectors, the world's first hybrid solar-powered cargo vessel is set to set sail--offering a blueprint for the ...

In a groundbreaking shift towards sustainable maritime transport, the Blue Marlin debuts as the world's first inland vessel to harness solar power directly for propulsion, setting a ...

Delivering up to 35 kilowatts under optimal conditions, Wattlab says the Blue Marlin 's solar power system will operate in conjunction with ...

Dutch solar innovator Wattlab and German inland shipping giant HGK Shipping have teamed up to launch the world's first hybrid solar ...

Delivering up to 35 kilowatts under optimal conditions, Wattlab says the Blue Marlin 's solar power system will operate in conjunction with four diesel generators powering the ...

Simultaneously, improvements in storage and energy management technologies are enabling ships to store and deploy solar energy more efficiently, reducing dependency on ...

It is a general trend to increase the use of renewable energy on ships to improve the ship sustainability. This article summarized the current development and application of solar ...
