This follows discovery of rogue communication devices not listed in product documents in some Chinese solar inverters, according to ...

Energy companies, cybersecurity experts and lawmakers warn that U.S. dependence on Chinese inverters that can be manipulated remotely is a growing security threat.

An unidentified illegal communication device has been found in Chinese solar inverters, prompting U.S. energy authorities to reevaluate security risks for renewable energy ...

Reuters claims that last November, some solar inverters in the US were disabled remotely by China. That event supposedly sparked a wider inquiry.

Energy companies, cybersecurity experts and lawmakers warn that U.S. dependence on Chinese inverters that can be manipulated ...

According to Reuters, experts have discovered secret cellular radios and other communications gear inside solar inverters and solar batteries made by Chinese companies. ...

This follows discovery of rogue communication devices not listed in product documents in some Chinese solar inverters, according to Reuters. The number of devices ...

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

The increasing reliance on renewable energy sources, particularly solar power, has brought a critical vulnerability into sharp focus: the widespread use of Chinese-made solar ...

Recent reports indicate a troubling discovery: unauthorized Chinese communication devices have been located within solar panels and wind turbines across the ...

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter.

The integration of critical grid technologies, such as utility-scale solar and battery inverters, sourced from foreign entities of concern pose unacceptable national security, ...
