The Current State of Global Energy Storage Imagine stacking 1.2 million Tesla Powerwalls - that's roughly 1,200 GWh of operational storage worldwide as of Q2 2024.

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid.

has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated ...

In the second quarter of 2024, US developers put into operation 33 energy storage projects in 10 states with an installed capacity of 2.9GW. The cumulative installed capacity of ...

When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once completed, the project will be amongst the largest ...

A report from McKinsey projects that there will be between 1.5-2.5 terawatts (about 85-140 terawatt-hours) of long-duration energy storage capacity globally by 2040, ...

The global battery industry has been gaining momentum over the last few years, and investments in battery storage and power grids surpassed 450 billion U.S. dollars in 2024.

Large-scale battery storage installed capacity will have grown from 1 GW in 2019 to 98 GW in 2030, according to Wood Mackenzie's energy storage deployment forecast.

Listed below are the five largest energy storage projects by capacity in the US, according to GlobalData's
