How much do solar panels cost in New York?

As of 2024, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt.

How much does a solar system cost?

This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations typically have a lower cost per watt because the panels can be purchased at a 'bulk price.'

How much do PV panels cost in New York?

As mentioned above, the typical cost of PV panels in New York fluctuates between \$9,856 and \$24,640 for most residents. The range is so wide because there are quite a few cost factors that can swing your price above or below the average in your area.

How do solar incentives work in New York?

Incentives help bring solar's price tag down considerably in New York. Here are the major ones to know about: Lowers your solar panel system's cost by 30%, but expires on January 1, 2026. You don't need to pay any sales tax on new solar panel systems in New York, saving at least 4% of your system costs.
