How much does a wind farm cost?

Depending on the scale and location, the CapEx for wind farms can range from a few million to several billion dollars. However, the return on investment (ROI) is increasingly attractive due to declining costs, government incentives, and long-term power purchase agreements (PPAs).

How much does a wind turbine cost?

And calculating the "simple" cost of a wind turbine isn't simple at all. Current projections for the cost of an offshore turbine is about \$1.5M per Megawatt of power produced - meaning a 10MW wind turbine would come to about \$15,000,000. But myriad factors go into the actual calculations.

What is the wind cost dashboard?

This dashboard provides an overview on the latest wind costs. An unexpected error occurred. If you continue to receive this error please contact your Tableau Server Administrator.

How much does a Nordex turbine cost?

Midway through the year, Nordex, based in Germany, recorded an average selling price of EUR890,000/MW or about \$965,000/MW USD. In May 2023, Siemens' Tim Dawidowsky famously commented, "it's all about cash." Obviously, Dawidowsky wanted to see European turbine makers get more money - and he's not alone.
