As countries race to ditch fossil fuels, this \$220 million project isn't just keeping up; it's rewriting the rules of the game. The station combines two storage rockstars: It's like having ...

Laos is emerging as a key player in Southeast Asia's renewable energy transition. With abundant hydropower resources and growing demand for grid stability, energy storage solutions are ...

An energy storage mechanism is introduced to stabilize power generation by charging the power storage equipment during surplus generation and discharging it during periods of insufficient ...

With an estimated investment of USD 450 million, the project remains in the feasibility stage as of September 2025. Globally, pumped-storage hydropower has been ...

French energy giant EDF is planning the construction of a 240 MW floating solar power plant at the Nam Theun 2 Hydropower plant on the Nam Theun River, in Laos..

Huawei's overseas endeavors in energy storage align seamlessly with global sustainable energy objectives. The company's projects significantly support the transition ...

Lahore, Pakistan - March 24, 2025 - In a landmark move towards advancing sustainable energy solutions in Pakistan, Huawei and AE Power have officially entered into a strategic partnership ...

Wait, no - it's Laos' first grid-scale storage facility using Huawei's latest grid-forming inverters. These devices essentially teach old power grids to speak renewable energy's language.

Sinohydro Corporation, China's largest builder of hydropower plants, has signed a contract with Laos'
