Discover GSL Energy's advanced liquid cooling energy storage systems for commercial and industrial applications. Scalable to 5MWh, certified by UL, CE, CEI and IEC.

On March 6th, the world's first submerged liquid cooled energy storage power station - the Meizhou Baohu Energy Storage Power Station of China Southern Power Grid officially put into ...

Located in Meizhou City, Guangdong Province, the plant has an energy storage capacity of 140 MWh and deploys advanced LFP battery products from Hithium.

InnoChill's immersion liquid cooling technology holds immense promise for applications in energy storage, electric vehicles, and beyond, driving efficiency and ...

High Taihao Energy has launched an integrated immersion liquid cooling solution that combines cooling, heating, intelligent control, and fire safety, ensuring safe and efficient ...

Following the pioneering application of Kortrong's immersion liquid cooling technology in the world's first immersion-cooled energy ...

Following the pioneering application of Kortrong's immersion liquid cooling technology in the world's first immersion-cooled energy storage power station, Kortrong ...

Among them, indirect liquid cooling is mainly based on cold plate liquid cooling technology, and direct liquid cooling is mainly based on immersion liquid cooling technology.

Submer is an immersion cooling company that works to enable next-generation cooling and automation for

data and energy ...

Let's face it - traditional air-cooled energy storage systems are like trying to cool a volcano with a desk fan. As grid-scale projects balloon in size and battery densities skyrocket, ...

Liquid-cooled energy storage is becoming the new standard for large-scale deployment, combining precision temperature control with robust safety. As costs continue to ...

Submer is an immersion cooling company that works to enable next-generation cooling and automation for data and energy-intense environments by integrating its efficient ...
