Solar-powered floating homes are transforming Berlin's waterfront experience in 2025, offering travelers an eco-friendly escape with prime skyline views. These innovative ...

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail ...

Here you can peruse detailed information on the long-term potential of solar energy use in Berlin. Discover also where existing solar-thermal and photovoltaic systems are located and how they ...

As the world races toward a sustainable future, Germany is leading the charge with an innovative twist on solar energy: balcony photovoltaic systems, or "balkonkraftwerk."

As the world races toward a sustainable future, Germany is leading the charge with an innovative twist on solar energy: balcony ...

While it does not mandate PV systems at the federal level, it allows electricity generated from PV to count toward the renewable ...

Solarimo, a subsidiary of the French energy group Engie, is installing photovoltaic systems with a total capacity of 808 kilowatts in the Spandau district of Berlin.

At its core, Photovoltaic Tourism involves the use of photovoltaic (PV) systems, which convert sunlight into
