---

Microgeneration -- rooftop solar systems installed on homes and small buildings -- is not just the foundation of Ireland's solar story. It's the future of energy for hundreds of thousands of ...

Despite strong policy support and growing public interest, the vast majority of Ireland's roof space remains untapped. This matters because rooftops are one of the most ...

Over 100,000 rooftop solar microgenerators have now been connected to Ireland's electricity network, according to ESB Networks, ...

There is now over 400 MW of rooftop solar and 650 MW of grid-scale solar connected to the grid in Ireland -- compared to just 25 MW in 2019 -- with over 100,000 consumers feeding clean, ...

More than 140,000 homes now generate their own power from the sun, and by mid-2025, Ireland had 576MW of microgeneration ...

A big part of the solution to Ireland's energy problem could now be solar PV microgeneration. The government's climate action plan, launched last week, contains a commitment to "change the ...

A big part of the solution to Ireland's energy problem could now be solar PV microgeneration. The government's climate action plan, launched last ...

Modern battery technology now enables Irish homeowners to capture and store excess solar energy during sunny periods, providing reliable power even during our cloudy ...

More than 140,000 homes now generate their own power from the sun, and by mid-2025, Ireland had 576MW of microgeneration installed on rooftops across the country."

Ireland surpassed 2.1 GW of installed solar capacity in November 2025, and the country's solar association, Solar Ireland, has revealed that 1 GW of this is from rooftop ...

This read explores the role of solar panels in Ireland's clean energy goals, the progress made so far, challenges facing widespread ...

This read explores the role of solar panels in Ireland's clean energy goals, the progress made so far, challenges facing widespread adoption, and the broader environmental ...
