Are undocumented communication devices hidden in Chinese-made solar inverters?

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

Are 'rogue' communication devices hidden inside solar power inverters?

In a discovery that has sent shockwaves through the cybersecurity community, U.S. energy officials have found undocumented 'rogue' communication devices hidden inside solar power inverters imported from China.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Despite typical safeguards, including firewalls against direct communication, rogue communication devices have been uncovered in several Chinese solar inverters, raising ...

These undocumented communication modules offer an invisible back door into devices that regulate a growing share of the ...

While inverters are built to allow remote access for updates and maintenance, the utility companies that use them typically install firewalls to prevent direct communication back ...

A shipping container solar system is a modular, portable power station built inside a standard steel container.

Is the solar container communication station inverter equipment real

A Higher Wire system includes solar panels, a lithium iron phosphate ...

Technical experts conducting detailed hardware inspections, or "teardowns," of inverters connected to U.S. power grids revealed the presence of unauthorized communication ...

Over the past nine months, forensic security teams have logged multiple brands of Chinese solar inverters containing hidden wireless ...

These undocumented communication modules offer an invisible back door into devices that regulate a growing share of the world's electricity. "It effectively means there is a ...

Reuters published a story yesterday that seems alarming on its face -- Chinese manufacturers may be putting secret communication devices in our solar inverters.

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar ...

Over the past nine months, forensic security teams have logged multiple brands of Chinese solar inverters containing hidden wireless communication equipment. Investigators have also ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in ...
