What is Juba solar power station?

The Juba Solar Power Station is a proposed 20 MW (27,000 hp) solar power plant in South Sudan. The solar farm is under development by a consortium comprising Elsewedy Electric Company of Egypt, Asunim Solar from the United Arab Emirates (UAE) and I-kWh Company, an energy consultancy firm also based in the UAE.

Where does Juba get its electricity?

Most of the electricity in the country is concentrated in Juba the capital and in the regional centers of Malakal and Wau. At that time the demand for electricity in the county was estimated at over 300 MW and growing. Nearly all electricity sources in the country are fossil-fuel based, with attendant challenges of cost and environmental pollution.

Who joins the Juba solar project?

“South Sudan: Asunim and I-kWh join the Juba solar project (20 MWp)”, Afrik21.arica. Paris, France. Retrieved 2 June 2022. ^Carmen (9 February 2022). “Juba Solar PV Park, South Sudan”. Power-Technology. New York City. Retrieved 2 June 2022.

How much does a power station cost in South Sudan?

This power station is an attempt to (a) diversify the country's generation mix (b) increase the country's generation capacity and (c) increase the number of South Sudan's homes, businesses and industries connected to the national grid. The power station is reported to cost an estimated US\$45 million to construct.

The main development objective of the Project is to strengthen the distribution networks in Juba in order to provide reliable electricity and increase access in the city which is currently at a very ...
