As Kenya continues to position itself as a hub for renewable energy innovation, the installation of large-scale Battery Energy Storage Systems, the growth of electric mobility, and ...

This project is more than just an installation; it's a showcase of how advanced solar power storage can support energy resilience, reduce operational costs, and drive ...

The BESS project will reduce the impact of intermittency on the grid and store power for use during peak hours. KenGen is working with the World Bank to fast-track ...

KenGen emphasised that beyond powering the MDC, the storage system enhances grid stability, improves energy independence, and ensures backup during outages. The ...

In 2020, developers broke ground for the construction of a Sh5 billion 80Mw renewable power project in Meru County, with a battery ...

While KenGen's BESS project shows how storage can help with reliability, a country aiming to run entirely on renewable energy by 2050 will need not just dozens but ...

The Kenya Electricity Generating Company PLC (KenGen) is to implement a Battery Energy Storage System (BESS) project as part of a World Bank funded programme. ...

According to KenGen, the new facility demonstrates how renewable energy storage can enhance grid stability, energy independence, cost efficiency, and provide seamless ...

Kenya is stepping up its renewable energy efforts with a newly announced solar-plus-storage project, aiming
