-----

Whether you work with renewables like wind and solar or industry bedrocks like coal, oil and natural gas, we can help you modernize your assets to increase visibility, reliability, and ...

Hardware agnostic - GEMS Power Plant Controller supports a wide range of devices from major manufacturers of renewables, energy storage, and thermal generation equipment.

Manages power, frequency, and ramp parameters from solar, wind, and hybrid plants, providing easy interaction with multiple generation units and a dashboard for set-point achievement.

Our complete range of power plant control room solutions is future-proof, offering dynamic flexibility to support evolving technology, equipment upgrades, and operational changes, ...

Learn how to achieve unparalleled renewable and storage power management with the Hitachi Energy Power Plant Controller.

The power plant controller (PPC) supports both national and international grid codes, thus enabling grid-compliant feed-in from PV systems at medium-voltage and high-voltage levels ...

It features an advanced algorithm that is combined with a fast and efficient communications system with responses times of less than one second, permitting a precise control of the active ...

Sustainable power generation mainly focuses on three pillars: wind power, hydro power, and solar power. We support the adoption of wind energy by using software and hardware that help ...

More than 130,000 wind turbines have already been automated with control technology from Beckhoff. It

# Large wind and solar generator power station control equipment

Website: <https://www.aitesigns.co.za>

covers all functions, such as operational management, pitch control, yaw systems, ...

ePowerControl PPC is suited for the control and monitoring of utility-scale solar plant applications (grid-tied or off-grid), with advanced capabilities in the field of PV monitoring system.
