On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 ...

BESS, or Battery Energy Storage System, is a technology that allows electricity to be stored with the objective of feeding it back into the grid at times of peak demand. The ...

The upgraded CHPPs of Latvenergo AS are mostly operated in the highly efficient cogeneration mode in accordance with the thermal energy ...

The upgraded CHPPs of Latvenergo AS are mostly operated in the highly efficient cogeneration mode in accordance with the thermal energy demand, which in turn depends on weather ...

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a ...

Latvia has taken a significant step towards a greener future with the commissioning of its first utility-scale battery energy storage system (BESS). The 10MW/20MWh BESS, ...

The first BESS projects are being implemented in Latvia at its own production sites, starting with the "smaller-scale" BESS at the Latvenergo AS CHPP-1 gas-fired power ...

The first BESS projects are being implemented in Latvia at its own production sites, starting with the "smaller-scale" BESS at the ...

In November 2024, Utilitas Wind Ltd inaugurated Latvia's first storage battery system with a capacity of 10 MW and 20 MWh in Targale, next to the existing wind park.

Secure Latvia's power grid with Rolls-Royce's large-scale battery storage, syncing Baltic energy with Europe by 2025.

In November 2024, Utilitas Wind Ltd inaugurated Latvia's first storage battery system with a capacity of 10 MW and 20 MWh in Targale, ...

There are currently a total of 23 operational biogas power stations and seven biomass power stations in Latvia. Most of them are cogeneration stations.
