---

Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid, which can ultimately reduce energy costs for New Yorkers. As New York State transitions to ...

Through origination, development, construction, and operation of utility-scale wind, solar, and storage facilities, distributed energy resources, and green fuel technologies, Apex is ...

Solar and wind power are planned to develop in tandem with battery storage so excess energy can be saved while nature provides wind or sun. Battery storage is meant to ...

Led by a team of industry veterans, including CEO Karl Dahlstrom, PNE USA has successfully developed and monetized 877MW of wind and solar projects to date, and ...

By enhancing the viability of solar and wind power, the project helps reduce greenhouse gas emissions, fostering a cleaner, healthier planet for current and future ...

US infrastructure investor Lotus Infrastructure Partners has acquired the US arm of German renewables developer PNE AG (ETR:PNE3), taking hold of its 3-GW-plus ...

By enhancing the viability of solar and wind power, the project helps reduce greenhouse gas emissions, fostering a cleaner, healthier ...

Battery energy storage will be increasingly necessary to store power from renewable energy, like wind and solar, over the coming years to create a more reliable electric grid that delivers clean ...

Through origination, development, construction, and operation of utility-scale wind, solar, and storage facilities, distributed energy ...

Lotus Infrastructure Partners announced that it has completed the acquisition of PNE USA, an established developer of utility-scale wind, solar, and energy storage projects in ...

Solar and wind power are planned to develop in tandem with battery storage so excess energy can be saved ...

Based on a longstanding history of identifying trends across the entire infrastructure and energy value chains, Lotus is dedicated to pursuing attractive, risk-adjusted returns from both ...
