Photovoltaic glass can be customized to achieve a solar factor between 6% and 41%. A low g-value is desirable to prevent overheating, especially in warm climates, as it prevents the ...

It is possible to order other dimensions as well. The maximum size that can be ordered is 1200 mm x 3600 mm. The glass thickness increases along ...

Photovoltaic glass can be customized to achieve a solar factor between 6% and 41%. A low g-value is desirable to prevent overheating, especially in ...

SCHOTT(R) Solar Glass combines excellent transmittance from UV-A to near-infrared with long-term spectral stability. It ensures that solar and optical systems capture maximum usable light, ...

While typical solar glass panels are often around 1.6 meters wide and 1.0 to 2.0 meters long, it's critical to recognize that some can be custom-designed to meet specific ...

Max. Glass Size. Contact Us | Terms of Use Copyright (C) 1989 - 2020 Xinology Co., Ltd. All Rights Reserved.

Size options: Manufacturers offer the largest PV glass available in the market, with dimensions up to 4 x 2 meters. Transparency levels: Amorphous silicon PV glass can be ...

et Aesthetic Description Solarban(R) 70 glass (formerly Solarban(R) 70XL glass) is a solar control, low-e glass that brilliantly combines the clear appearance of transparent, color-neutral glass ...

*** The largest size for Pilkington Energy Advantage™ 1/2" (12 mm) is 130 x 204. **** Pilkington Solar-ETM is not available in 1/2" (12 mm). All performance values are center-of-glass values ...

Maximum size of solar glass
