Why is solar a good option for Long Island power solutions?

Solar is efficient, without any of the waste that is seen on the grid. Solar is more reliable, especially with a battery backup system. Solar is more affordable, with significant savings even when financing a system. Every Long Island Power Solutions solar installation comes with a 25 Year Warranty! Solar works year-round.

Why should you install solar panels in Long Island?

It's the price of electricity. We can't fix the high taxes or the traffic on Long Island, but we can make your electricity more affordable. Solar panel installation at your home in Long Island will give you independence where you take less from the grid and save more every month.

Are EnergySage storage installers pre-screened?

At EnergySage, we care about connecting shoppers to high-quality companies. As such, any storage installers we list above are active on the EnergySage Marketplace in New York and pre-screened by our team. What does it mean to be "pre-screened"? We evaluate every storage installer to ensure that they'll provide quality service to EnergySage users.
