How much does a solar panel installation cost?

One of the biggest cost factors for your solar panel installation is the size of the system you have installed. System size is measured in kilowatts (kW) and is determined by household energy consumption. The average cost per watt is \$3.04, but larger systems often have a lower cost per watt.

How much does solar cost in 2025?

Solar panel costs have reached historic lows in 2025, making home solar more affordable than ever before. With the average residential solar system costing between \$20,000 and \$30,000 before incentives, and the federal 30% tax credit scheduled to step down after 2025, now is an optimal time to invest in solar energy.

How much does a rooftop solar system cost?

Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. Electrical wiring and hardware: This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

How much does a solar system cost?

On average, residential solar installations range from \$24,000-\$36,000 after applying federal tax credits. A 15,900 kilowatt-hour (kWh) system of 18-34 panels for a standard three-bedroom home costs an average of \$24,222, according to our survey. However, solar costs can vary widely depending on where you live.
